STILISTA

Our new professional styler

MADE IN ITALY

MADE IN ITALY

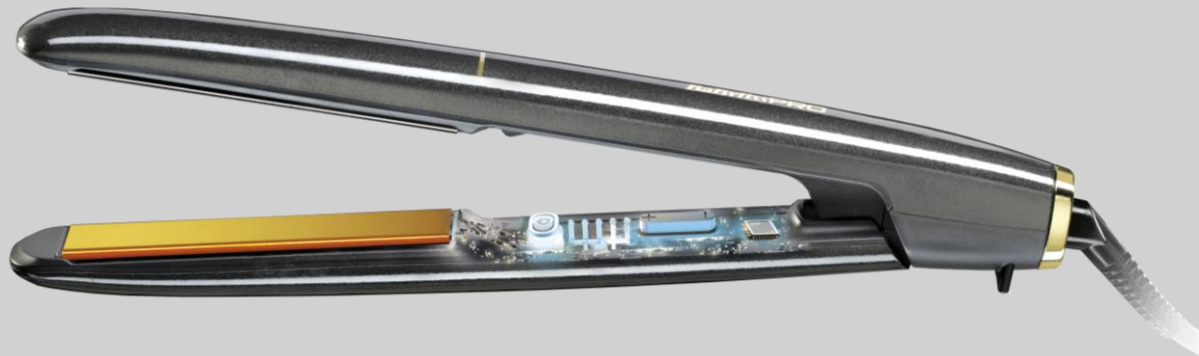

Our Italian factory's philosophy has always been centered on manufacturing to the highest possible standards.

It made perfect sense to us to not only make the most of it for our hair dryers but also for our stylers.

And our new styler STILISTA perfectly reflects the high-quality, reliability and sustainability that has made Italian craftsmanship celebrated globally.

BaBylissPRO®

HIGH-TECH

Crafted using the most advanced engineering and materials.

Redefining ease of use, premium performance and excellence of styling.

***BaByliss*PRO[®]**

SUPER FAST HEAT-UP AND RECOVERY TIME

The Advanced Ceramic heating system with responsive microprocessor control delivers faster, more consistent heat, giving quicker, better styling results while protecting the hair integrity

Outstanding speed:

40 seconds to reach 220°C

2 TIMES FASTER*

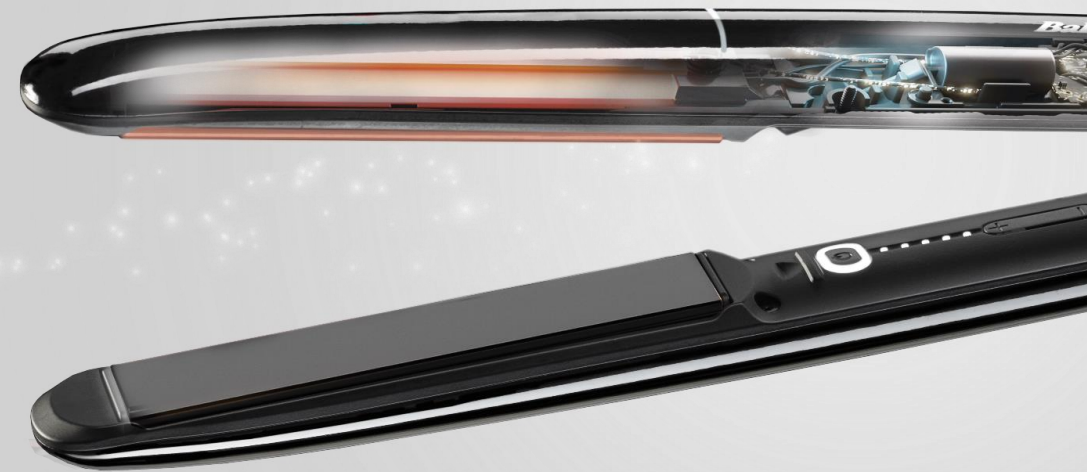

50% faster recovery time*

To instantly create flawless long-lasting styles

FAST STYLING MEANS PRICELESS TIME SAVING

* compared to other BaBylissPRO straighteners

BaBylissPRO

STYLING EXCELLENCE

25 x 110 mm

Super glide true Titanium ultra-floating plates.

Even heat distribution and smooth gliding to preserve hair fibre integrity.

Titanium is an exceptional conductor of heat and is stable at higher temperatures. It helps deliver ultimate heat performance.

Titanium's smooth surface is exceptionally resistant to chemical corrosion.

Ultra-floating plates to smooth hair more effectively, reducing the need for multiple passes and minimizing exposure to heat.

Perfect plate alignment for optimum control of the hair strand and flawless styling results.

Stay-cool housing to get closer to the roots.

BaBylissPRO[®]

CONTROLLABLE HEAT FOR HAIR CARE

Adjustable temperature setting allows for customization based on hair type and styling needs.

It offers **5 precise heat settings from 150°C to 230°C** in increments of 20°C that are reached within seconds. The perfect range of temperatures to create looks for all hair types and textures.

Last setting memory function

Smart detection automatically memorizes the last setting used until the next use.

BaBylissPRO

“**Hairdresser View**

The thing that's awesome about this straightener is that I really think of it as a multi-use tool. It's great to create movement in the hair as well as a high gloss shine.

Multiple heat settings give us stylists the versatility to create whatever we want, from super straight hair to full volume and movement looks.”

”

FRIZZ - CONTROL AND SHINE

Advanced ionic technology produces millions of negative ions decreasing tension caused by static electricity at the surface of the hair and actively controlling frizz.

Ionic technology leaves hair with a **smooth, shiny finish**, free of frizz and fly-aways, making it much easier to style.

BaBylissPRO®

CURVED DESIGN

Ergonomic curved design ensures ease of use and transforms hair adding volume or forming perfect waves and curls.

Stay-cool housing to get closer to the roots of hair, effortlessly giving more lift and volume.

BaBylissPRO®

DURABILITY, SAFETY AND SUSTAINABILITY

Long-life high-performance Advanced Ceramic heating element.

Balanced ergonomic housing design crafted from **highly durable materials**.

360 ° Rotating swivel cord.

Protecting the power cord and helping to prevent cord breakage which is a key concern for hair styling professionals with the hair tools they use.

Stay-cool ryton housing and **automatic shut-off** after 60 minutes for added safety. Auto shut-off also increases the life of the styler.

Made in Italy to reduce environmental impact.

100% recyclable eco-friendly zero-plastic packaging.

BaBylissPRO[®]

ACCESSORIES

Comes with a **pouch** to protect the styler from damage and to store it when not in use. The **heatproof** lining allows the styler to be stored after use even when it is still warm.

It also makes it easier to keep the styler tidy, ensuring that the cord doesn't get tangled.

Silicone plate guard helps to protect the plates when not in use, preventing scratches and knocks which could affect the styler's performance.

BaBylissPRO[®]
