

2200W DIGITAL BLOW DRYER **GOLDFX**

Dear Hair Artist,

You have made the choice of the **GOLDFX** dryer. Made in Italy, the BaBylissPRO4Artists **GOLDFX** offers the superior engineering and sleek styling that make our **GOLDFX** tools so popular.

This is only the beginning of a long and fruitful relationship which will make you work even better and faster.

High performance
Perfectly balanced
Italian-designed

Reasons why you have made the right choice:

EDM TECHNOLOGY
electronic **DIGITAL** motor

Provided with digital motor, its lifespan is up to 10 times longer than traditional hairdryers and driven by electronics for optimum output. Air flow and speed are constantly controlled for maximum stability. There is no decrease of power, nor decrease of performance. Vibrations are significantly reduced.

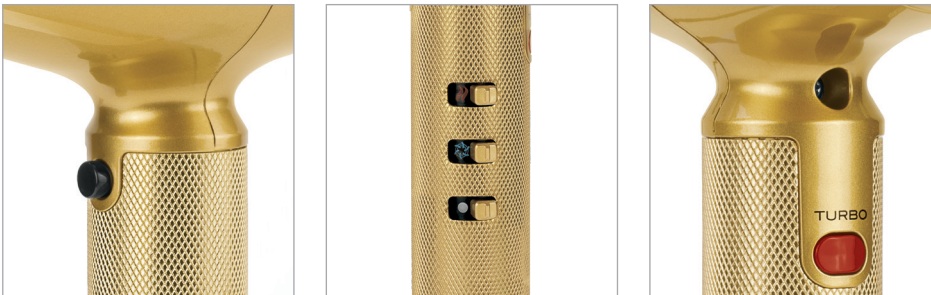

This exclusive feature offers genuine efficiency, the best styling results and total respect of the hair fiber

▶ **You will work in better conditions, faster, you will get even better styling results and make your clients always happier.**

Turbo function, power and care booster

The turbo function has the twofold advantage of being able to increase speed and air flow without increasing temperature. It makes drying faster or can emphasize the finishing touches on certain locks without compromising hair protection.

The **GOLDFX** features 2 speed settings and 2 temperature settings for maximum flexibility and a cold shot for the final touch.

▶ **You will work super fast while preserving your clients' hair integrity.**

Ionic technology

Its ionic generator makes drying and styling easier in decreasing tension at the hair surface, giving smooth, shiny and healthy hair.

▶ **Your clients are happy because you transform their hair into a beautiful smooth, shiny and easy-to-style matter.**

Ergonomic design and perfect balance

The **GOLDFX** weighs 420 grams only. Its knurled metal extended handle ensures ultimate no-slip grip. Perfectly aligned with the appliance's centre of gravity, it is the guarantee of a balanced, comfortable grip.

▶ **You will work without strain in the forearm and without tiredness.**

Accessories

The **GOLDFX** hair dryer comes with 3 different concentrator nozzles. One straight, narrow 6mm x 60mm nozzle that is perfect for straightening because it lets you achieve the required tension on the hair.

One ultra-thin 4mm x 70mm nozzle for optimal, controlled air pressure and even more efficiency.

6 x 75 mm beveled, large nozzle for smoother blow-drying; it is slightly diagonal in shape, hugging the shape of the brush perfectly.

A comb comes as an attachment to this nozzle to allow beard drying and styling. We recommend to set the dryer on temperature I and speed I (or speed II if you wish to lower the temp level even more) with or without turbo every time you use it for beard's care.

The **GOLDFX** also comes with a **silencer** for always more comfort in use for your clients and you, as well as a **diffuser** for drying curly and wavy hair without adding unwanted volume.

▶ **Endless possibilities of creations and uses are brought to you by the GOLDFX dryer.**

Specially designed for maximum airflow, low noise, low vibration and minimum weight, the GOLDFX blow dryer, a pure MADE IN ITALY technological and engineering gem, delivers faster drying and long lasting styling results with your and your clients' comfort in mind.
